

CanEx-SM10 data policy

The investigators of the Canadian Experiment for Soil Moisture in 2010 (CanEx-SM10) agreed to share the CanEx-SM10 datasets with the scientific community.

Except for the data subject to specific licensing (e.g., RADARSAT-2 and SPOT), all CanEx-SM10 datasets were made available for general distribution from June 2012, i-e, two years after the end of the field campaign (June 2010).

The datasets are offered free of charge. All publications or presentations based on CanEx-SM10 data are expected to cite CanEx-SM10 as the source and to acknowledge the CanEx-SM10 project.

Co-authorship can be offered to CanEx-SM10 investigators when their data contribute significantly to a manuscript submitted for publication.
